RX SERIES

Overwhelming power to lift the world

SPECIFICATION

ITEM			ROPS POWER SHUTTLE	CABIN POWER SHUTTLE
			RX8040P-EU	RX8040PC-EU
Engine	Daedong engine type		4HT5	4HT5
	Engine gross power	HP(kW)	73.1(54.5)	73.1(54.5)
	Total displacement	cc(cu.in)	2,435(148.6)	2,435(148.6)
	Fuel tank	ℓ(us gal)	100(26.4)	100(26.4)
External dimensions	Overall length	mm	4,295	4,295
	Oveerall width	mm	2,024	2,024
	Overall height	mm	2,917	
	Wheel base	mm	2,170	2,170
	Ground clearance	mm	400	400
	Weight with ROPS	kg.f	2,836	-
	Weight(including cabin, excluding front weight)	kg.f	-	3,182
	max permissible weight	kg.f	4,830	5,300
Drive train	Transmission	Shuttle	Power shuttle	Power shuttle
		Speeds	20×20	20×20
	PTO type		Independent	Independent
	4-wheel drive		Hydro multi wet disc clutch	Hydro multi wet disc clutch
Hydraulic system	3 Point lift control type		Electronic control	Electronic control
	Total hydraulic flow	lpm(cc/rev)	78(30)	78(30)
	Max. lifting capacity (610mm behind)	kg.f	2,253	2,253
	No.of port on standard remote valves (Front/Rear)		4	4

A Spacious and Comfortable Work Environment

The RX Series ensures a pleasant work experience characterized by comfort and relaxation. With cutting-edge technology, it caters to operators' needs from the moment they step onto the machine to the moment they disembark after completing their work, ensuring continuous comfort throughout.

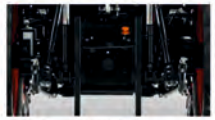
Power Steering
Minimizes the effort required to make tight, repetitive turns. The steering wheel tilts with the simple push of lever, allowing easy adjustment to fit the operator s needs.

Projection Head and Working Lamp
The LED projection head and working lamp pierce the darkness, casting a wide, clear beam that illuminates your field for safe, precise maneuvering even after sunset.

Expansive 5-Pillar Cab (Cab Models)
The 5-pillar cab s unobstructed panoramic view puts every field corner within sight. Expansive windows and extra headroom banish blind spots and cramped quarters, letting you maneuver with confidence and ease.

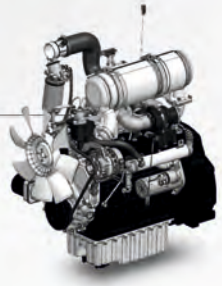
Deluxe Suspension Seat (Cab Models)
The ergonomically designed, fully adjustable suspension seat cradles you in support, no matter how harsh the ride. A handy pocket on the back of the seat gives you instant access to the operator s manual.

Optional Instructor Seat (Cab Models)
Minimizes the effort required to make tight, repetitive turns. The steering wheel tilts with the simple push of lever, allowing easy adjustment to fit the operator s needs.



Hydraulic Independent PTO
A safety interlock prevents the engine from starting when the PTO switch is left on. All models have a manual or automatic PTO option. When the Auto PTO is engaged, it shuts off automatically when the 3-point control is raised, ensuring safety.

Climate Control System (Cab Models)
The cab models offer optimal temperature control keeping operators cool in the summer and warm in the winter, ensuring they stay comfortable, focused, and productive all year around.



01_ Fuel Efficient Diesel Engine
KIOTI 4-Cylinder in-line vertical, water-cooled turbo diesel, CRDI engine improves fuel efficiency while reducing noise levels. Offers the operator a quiet work environment with powerful performance.

02_ Torque Compensation
Enables the engine to maintain a consistent and stable torque level under all conditions. Prevents stalling or the loss of grip, while reducing driver fatigue.

03_ Multiple Transmission Options
Three transmission options make it a great choice for any job. Choose from the 12F +12R synchronized shuttle, 12F +12R power shuttle or 20F +20R power shuttle with creeper.

Enhanced Outstanding Performance

The ultimate goal of using a tractor is to increase productivity. The RX Series contributes to boosting productivity based on outstanding technology, also boasting the highest performance among similar models with differentiating functions and equipment.

Power Shuttle Lever (Power Shuttle Models)
Effortlessly change forward and reverse direction with the Power Shuttle Lever, no clutch pedal required.

Electronic 3-Point Hitch
Allows for effortless implement control with the flick of a wrist. Takes the guesswork out of raising and lowering implements, ensuring precise positioning and operator comfort.

Streamlined Hood Design
The hood design provides the operator with excellent visibility and the vertical opening enables quick and convenient access for maintenance.

Push Button 4 Wheel Drive
4WD is engaged with the simple push of a button. Auto 4WD engagement allows for increased brake performance.

High Fuel Capacity
The 26-gallon fuel tank lets you power through productive hours without interruption. Stay informed with a fuel indicator lamp and buzzer, so you never run dry unexpectedly.

PTO Cruise Control
With one touch, engine speed can be set to maintain a steady RPM for maximum working efficiency. Once engaged, operators can easily adjust RPM up or down with a simple switch.

Fast Traveling Speeds
Increased traveling speeds of up to 38.5 km/h allow your work to be done quicker.

Remote Hydraulic Valves and Joystick
Standard single lever joystick for easy loader or front implements operation. A standard single remote valve (additional valves optional) accommodate a wide variety of attachments and implements.
